GoalPath
SOLUTIONS

Fi360
A Broadridge® Company

Making fiduciary review and rebalancing scalable for retirement plan advisors

A rigorous, evidence-based selection process with quantitative and qualitative review

New “best-practices” open architecture QDIA solution with multiple glidepaths

Overview of the Fund Series

GoalPath Fi360 Funds are designed to manage risks that face retirement plan investors when it comes to replacing their income. The Funds take into account the transfer of human capital (current and future earnings power) to financial capital (retirement savings) over time. As retirement approaches, the Funds recognize this shifting risk and gradually change their asset allocation, holding more growth-focused assets (stocks and bonds) when an investor is many years away and more inflation protected hedged income securities (TIPS) as the target retirement date approaches.

Investment Selection Process: An Evidence-Based Approach

Our Academic Review Committee’s investment selection process combines robust academic research, Modern Portfolio Theory, rigorous testing and thorough peer review to select the investment lineup.

The Fi360 Fiduciary Score®

The **Fi360 Fiduciary Score** is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Fi360 Fiduciary Score is calculated on a monthly basis for investments with at least a three-year history. The score is calculated for open-end mutual funds, exchange-traded funds, collective investment trust funds, and group retirement plan annuities.

Investment List as of May 1, 2022

Questions. Answers.

What’s the advantage of including Fi360’s Scores as a fund selection factor within GoalPath’s strategies?

Including Fi360 Scores as a criteria within GoalPath’s fund selection process ‘builds-in’ scalable fiduciary reviews and rebalancing for advisors who select these strategies. This is a great example of technology driving efficiencies in fiduciary account management.

What is the relationship between GoalPath and Fi360?

GoalPath licenses Fi360’s Fiduciary Score as one of several fund selection criteria for use within the GoalPath Fi360 Funds. Fi360 serves only as a data provider to GoalPath and is not a sub-advisor to the funds.

2023-Q1 MARKET REVIEW

S&P 500 Index at inflection points

S&P 500 Price Index

Source: Compustat, FactSet, Federal Reserve, Refinitiv Datastream, Standard & Poor's, J.P. Morgan Asset Management. Dividend yield is calculated as consensus estimates of dividends for the next 12 months, divided by most recent price, as provided by Compustat. Forward price-to-earnings ratio is a bottom-up calculation based on IBES estimates and FactSet estimates since January 2022. Returns are cumulative and based on S&P 500 Index price movement only, and do not include the reinvestment of dividends. Past performance is not indicative of future returns. Guide to the Markets - U.S. Data as of March 31, 2023.

2023-Q1 MARKET REVIEW

Bloomberg U.S. Agg. annual returns and intra-year declines

Bloomberg U.S. Aggregate intra-year declines vs. calendar year returns
Despite average intra-year drops of 3.3%, annual returns positive in 42 of 47 years

Source: Bloomberg, FactSet, J.P. Morgan Asset Management.

Returns are based on total return. Intra-year drops refers to the largest market drops from a peak to a trough during the year. For illustrative purposes only. Returns shown are calendar year returns from 1976 to 2022, over which time period the average annual return was 6.6%. Returns from 1976 to 1989 are calculated on a monthly basis; daily data are used afterwards.

Guide to the Markets – U.S. Data as of March 31, 2023.

Fixed income valuations

Yield-to-worst across fixed income sectors
Percent, past 10 years

Source: Bloomberg, FactSet, J.P. Morgan Credit Research, J.P. Morgan Asset Management. Indices used are Bloomberg except for emerging market debt and leveraged loans: EMD (USD); J.P. Morgan EMIGLOBAL Diversified Index; EMD (LCL); J.P. Morgan GBI-EM Global Diversified Index; EM Corp.; J.P. Morgan CEMBI Broad Diversified; Leveraged Loans: JPM Leveraged Loan Index; Euro IG: Bloomberg Euro Aggregate Corporate Index; Euro HY: Bloomberg Pan-European High Yield Index. Yield-to-worst is the lowest possible yield that can be received on a bond apart from the company defaulting. All sectors shown are yield-to-worst except for Municipals, which is based on the tax-equivalent yield-to-worst assuming a top-income tax bracket rate of 37% plus a Medicare tax rate of 3.8%.

ANNUAL INVESTMENT OPTION COSTS

Each investment option is listed below. In many cases, especially in 401k plans, part of the expense ratio may be directed via 'revenue sharing' to other service providers such the advisor, recordkeeper or custodian. 12B-1 fees are commonly sent to the advisor while Sub-TA and Shareholder Service (SHR SVC) fees are commonly sent to the recordkeeper and/or custodian. Revenue sharing can be offset against other costs charged by a provider or additive to other costs they charge (see the Annual Cost Breakdown section for additional information). Fi360 calculates the MGMT FEE by subtracting any of these revenue sharing elements from the net expense ratio.

FEE WAIVERS

Federated Hermes Treasury Obl IS The Adviser and certain of its affiliates on their own initiative have agreed to waive certain amounts of their respective fees and/or reimburse expenses so that the total annual fund operating expenses (excluding acquired fund fees and expenses, interest expense, extraordinary expenses and proxy-related expenses paid by the Fund, if any) paid by the Fund's IS class (after the voluntary waivers and/or reimbursements) will not exceed 0.20% (the "Fee Limit") up to but not including the later of (the "Termination Date"): (a) October 1, 2023 ; or (b) the date of the Fund's next effective Prospectus. While the Adviser and its affiliates currently do not anticipate terminating or increasing these arrangements prior to the Termination Date, these arrangements may only be terminated, or the Fee Limit increased, prior to the Termination Date with the agreement of the Trustees.

State Street Aggregate Bond Index K The Fund's investment adviser, SSGA Funds Management, Inc. (the "Adviser" or "SSGA FM"), is contractually obligated until April 30, 2023, separately with respect to each of the Fund and the Portfolio, (i) to waive up to the full amount of the advisory fee payable

STYLE SUMMARY

This section groups each investment into a style category. The top charts show the number of investments grouped by their current Morningstar Style Box™. The bottom tables include investments within other style categories based on their current peer group. The Morningstar Style Box™ is a nine-square grid that provides a graphical representation of the investment style of mutual funds, exchange traded funds, group retirement plan annuities, variable annuity sub-accounts and separately managed accounts. US and International equities are classified according to market capitalization (the vertical axis) and growth and value factors (the horizontal axis). Fixed income funds are classified according to credit quality of the long bonds owned (the vertical axis) and interest rate sensitivity as measured by a bond's effective duration (the horizontal axis).

SHARE CLASS COMPARISON

This section displays a table for each mutual fund/ETF investment. Your selected share class(es) are colored in a blue background and any other related share classes will be displayed for analysis. Depending on the platform you are using and the amount of money you have to invest, a given share class may not be available. Consult your advisor for additional details.

Mutual funds and Exchange Traded Funds (ETFs) are sold by prospectus. Please consider the investment objectives, risks, charges and expenses carefully before investing. The prospectus, and, if available, the summary prospectus, which contains this and other information, can be obtained by calling your financial advisor. Read the prospectus and, if available, the summary prospectus carefully before you invest. The performance information shown represents past performance and is not a guarantee of future results. Investment returns and principal value of an investment will fluctuate so that when shares are redeemed, they may be worth more or less than their original cost. The performance information shown reflects performance without adjusting for sales charges. If adjusted, the load would reduce the performance quoted. Current performance may be higher or lower than the data shown. For the most recent month-end performance and information on expenses, visit www.fi360.com/directory. Percentile ranks calculated by Fi360, are based on the return shown compared to peer group (1 = top rank), do not account for sales charges, and are not provided for periods under a year.

FEDERATED HERMES TREASURY OBL IS TOIXX MONEY MARKET TAXABLE MF

GROWTH OF 10K

This graph shows a fund's performance based on how \$10,000 invested in the fund would have grown over time with dividends reinvested. The returns used in the graph are not load-adjusted. The growth of \$10,000 begins at the fund's inception, or the first year listed on the graph, whichever is appropriate. Located alongside the fund's graph line are lines that represent the growth of \$10,000 in the fund's Broad Index, Peer Group Index, and Best-fit Index Benchmarks, which are listed in the Benchmarks section. All lines are plotted on a logarithmic scale, so that identical percentage changes in the value of an investment have the same vertical distance on the graph. This provides a more accurate representation of performance than would a simple arithmetic graph.

INVESTMENT STRATEGY

The investment seeks to provide current income consistent with stability of principal. The fund invests in a portfolio of U.S. Treasury securities maturing in 397 days or less and repurchase agreements collateralized fully by U.S. Treasury securities. It will invest its assets so that at least 80% of its net assets (plus any borrowings for investment purposes) are invested in Treasury investments. The fund may also hold cash.

INVESTMENT STRATEGY

The investment seeks to track as closely as possible, before fees and expenses, the total return of the Bloomberg US Treasury Inflation-Linked Bond Index (Series-L)SM. The fund will invest at least 90% of its net assets in securities included in the index. The index includes all publicly-issued U.S. Treasury Inflation-Protected Securities (TIPS) that have at least one year remaining to maturity, are rated investment grade and have \$500 million or more of outstanding face value. The TIPS in the index must be denominated in U.S. dollars and must be fixed-rate and non-convertible.

INVESTMENT STRATEGY

The investment seeks to provide investment results that, before fees and expenses, correspond generally to the price and yield performance of the Bloomberg U.S. Aggregate Bond Index that tracks the U.S. dollar denominated investment grade bond market over the long term. Under normal circumstances, the fund generally invests substantially all, but at least 80%, of its net assets (plus borrowings, if any) in securities comprising the index or in securities that the Adviser determines have economic characteristics that are comparable to the economic characteristics of securities that comprise the index.

INVESTMENT STRATEGY

The investment seeks to replicate as closely as possible, before expenses, the performance of the Standard & Poor's 500 Index. The fund uses a passive management strategy designed to track the performance of the S&P 500. The index is a well-known stock market index that includes common stocks of 500 companies from a number of sectors and that measures the performance of the large-cap sector of the U.S. equities market. The advisor generally intends to invest in all stocks comprising the S&P 500 in approximate proportion to their weightings in the index.

INVESTMENT STRATEGY

The investment seeks to provide investment results that, before expenses, correspond generally to the total return of the Russell Small Cap Completeness Index that tracks the performance of mid- to small-capitalization exchange traded U.S. equity securities. The fund uses a passive management strategy designed to track the performance of the index. The index is a float-adjusted, market capitalization index which measures the performance of the Russell 3000® Index companies excluding S&P 500® constituents. The index is constructed to provide a comprehensive and unbiased barometer of the extended broad market beyond the S&P 500 exposure.

GoalPath Fi360 CITs

FI360 FIDUCIARY SCORE OVERVIEW

Fi360 Fiduciary Score®

Fiduciary Due Diligence Process

The Fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. It helps quickly identify a short list of investments during the selection process. It also facilitates the ongoing monitoring process by highlighting investments that exhibit potential deficiencies.

FI360 FIDUCIARY SCORE® CRITERIA

Regulatory Oversight The investment should be managed by a bank, trust company, or an insurance company, a registered investment company (mutual fund), or a registered investment advisor.

Minimum Track Record The investment should have at least three years of history.

Stability of the Organization The longest reported manager's tenure should be at least two years.

Assets in the Investment The investment should have at least \$75 million AUM (across all share classes).

Composition Consistent with Asset Class At least 80 percent of the investment's underlying securities should be consistent with the broad asset class.

Style Consistency The investment should be highly correlated to the asset class of the investment option, e.g., the Morningstar Style Box™ must match the peer group of the investment.

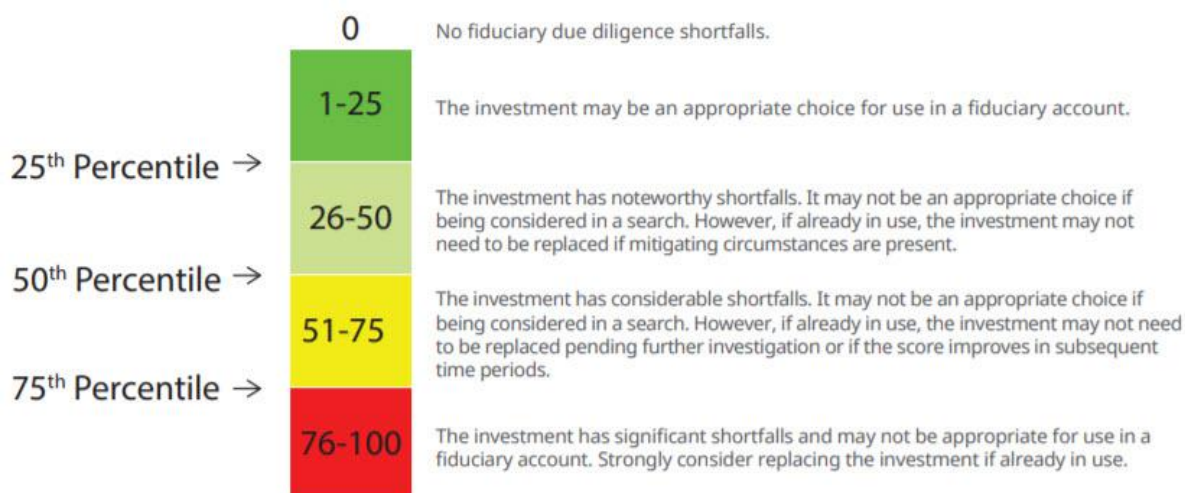

Expense Ratios/Fees Relative to Peers The investment's fees should not be in the bottom quartile (most expensive) of their peer group.

Risk-Adjusted Performance Relative to Peers The investment's risk-adjusted performance should be above the peer group median manager's risk-adjusted performance.

Performance Relative to Peers The investment's performance should be above the peer group's median manager return for 1-, 3- and 5-year cumulative periods.

CALCULATING THE FI360 FIDUCIARY SCORE®:

The Fi360 Fiduciary Score® is calculated on a monthly basis for investments with at least a three-year history. Each investment is evaluated against a set of factors and thresholds, then allotted penalty points. The penalty points are totaled and compared to all other investments within the peer group. Investments with 0 penalty points are automatically given an Fi360 Fiduciary Score of 0. Every other investment is then given a score of 1-100, representing their percent ranking based on its placement in the distribution of their peer group.

GoalPath Fi360 CITs

Fi360 FIDUCIARY SCORE® SUMMARY

The Fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Fi360 Fiduciary Score® Average is a one-, three-, five-, or ten-year rolling average of an investment's Fi360 Fiduciary Score®. All Scores are color coded based on the quartile they fall in (1st - Green; 2nd - Light Green; 3rd - Yellow; 4th - Red).

The ID column can be used to reference the investment on the following Scatterplot chart. Investments which do not have both Scores will not have an ID as they cannot be plotted on the chart. If multiple investments have the same Scores, they will be plotted together under 1 ID.

Inv. Data as of 03/31/23. Holdings as of 12/31/22. P Proposed R Remove W Watch

GoalPath Fi360 CITs

Fi360 FIDUCIARY SCORE[®] SUMMARY

The chart plots each investment using the selected Fi360 Fiduciary Scores. Investments without both Scores will be excluded from the chart. Green, yellow and red lines are drawn to highlight the different Fi360 Fiduciary Score quartiles. Investments in the bottom left corner of the chart are most preferred.

If \$ asset amounts are included, bubble sizes are based on the relative percentage invested in that investment. Bubble numbers refer to the ID's on the previous page(s). If multiple investments have the same Scores, they will be plotted together under 1 ID.

Performance information reflects past performance and does not guarantee future results. All returns are net of any fees that accrued within the fund, for more information on the fees please visit the fund's web page noted above. Investment return and principal value will fluctuate such that shares, when redeemed, may be worth more or less than their original cost. All returns that exceed 12 months are annualized.

Investment Philosophy

The Matrix Trust Company GoalPath Portfolios are designed to manage risks that face retirement plan investors when it comes to replacing their income. The GoalPath Portfolios take into account the transfer of human capital (current and future earnings power) to financial capital (retirement savings) over time. As retirement approaches, the GoalPath Portfolios recognizes this shifting risk and gradually change their asset allocation, holding more growth-focused assets (stocks and bonds) when an investor is many years away and more inflation protected hedged income securities (TIPS) as the target retirement date approaches. Conceptually, you can think of this process as systematically investing and accumulating "slices of retirement income" - a stream of inflation-adjusted annual income throughout retirement. By seeking to manage the relevant risks, we aim to increase clarity for investors as they plan for retirement, and to enable the delivery of meaningful information to help participants and plan sponsors better assess retirement readiness.

Investment Strategy

The GoalPath Fi360 2020 Indexed Aggressive Portfolio focuses on growth consistent with its target retirement date and, as it approaches its target date, management of retirement income risk. It seeks to allocate between (index) fixed income and (index) equity growth investments to balance income risk management against the opportunity to grow expected retirement income. The overall effect of interest rate fluctuations and equity market performance may impact the ability to achieve a desired level of retirement income. The portfolio may be appropriate for investors with a higher risk tolerance and a planned retirement date on or about 2020. The portfolio invests in an allocation of global equities, global fixed income, and treasury inflation protected securities by investing in mutual funds, collective investment funds, exchange-traded funds and other pooled investment vehicles. The portfolio is constructed and monitored using various statistics and measures, including, but not limited to, the Fi360 Fiduciary Score and its underlying components. The portfolio will initially allocate approximately 67% of assets in global equities, 2% in global fixed income, and 31% in treasury inflation protected securities. As the portfolio's target date approaches the global equities and fixed income allocation will be reduced and allocated to treasury inflation protected securities, reaching its most conservative allocation of approximately 60% global equities on or about its target retirement date.

Peer Group (5-95%): Separate Accounts - U.S. - Target-Date 2030

Investment Growth of \$10,000

Time Period: 1/1/2019 to 3/31/2023

Peer Group (5-95%): Collective Investment Trusts - U.S. - Target-Date 2030

Principal Risk

Performance information reflects past performance and does not guarantee future results. All returns are net of any fees that accrued within the fund, for more information on the fees please visit the fund's web page noted above. Investment return and principal value will fluctuate such that shares, when redeemed, may be worth more or less than their original cost. All returns that exceed 12 months are annualized.

Investment Philosophy

The Matrix Trust Company GoalPath Portfolios are designed to manage risks that face retirement plan investors when it comes to replacing their income. The GoalPath Portfolios take into account the transfer of human capital (current and future earnings power) to financial capital (retirement savings) over time. As retirement approaches, the GoalPath Portfolios recognizes this shifting risk and gradually change their asset allocation, holding more growth-focused assets (stocks and bonds) when an investor is many years away and more inflation protected hedged income securities (TIPS) as the target retirement date approaches. Conceptually, you can think of this process as systematically investing and accumulating "slices of retirement income" — a stream of inflation-adjusted annual income throughout retirement. By seeking to manage the relevant risks, we aim to increase clarity for investors as they plan for retirement, and to enable the delivery of meaningful information to help participants and plan sponsors better assess retirement readiness.

Investment Strategy

The GoalPath Fi360 2030 Indexed Conservative Portfolio focuses on growth consistent with its target retirement date and, as it approaches its target date, management of retirement income risk. It seeks to allocate between (index) fixed income and (index) equity growth investments to balance income risk management against the opportunity to grow expected retirement income. The overall effect of interest rate fluctuations and equity market performance may impact the ability to achieve a desired level of retirement income. The portfolio may be appropriate for investors with a lower risk tolerance and a planned retirement date on or about 2030. The portfolio invests in an allocation of global equities, global fixed income, and treasury inflation protected securities by investing in mutual funds, collective investment funds, exchange-traded funds and other pooled investment vehicles. The portfolio is constructed and monitored using various statistics and measures, including, but not limited to, the Fi360 Fiduciary Score and its underlying components. The portfolio will initially allocate approximately 59% of assets in global equities, 13% in global fixed income, and 28% in treasury inflation protected securities. As the portfolio's target date approaches the global equities and fixed income allocation will be reduced and allocated to treasury inflation protected securities, reaching its most conservative allocation of approximately 25% global equities on or about its target retirement date.

Expense Relative to Peer Group

Peer Group (5-95%): Separate Accounts - U.S. - Target-Date 2050

Investment Growth of \$10,000

Time Period: 1/1/2019 to 3/31/2023

Peer Group (5-95%): Collective Investment Trusts - U.S. - Target-Date 2050

Principal Risk

Performance information reflects past performance and does not guarantee future results. All returns are net of any fees that accrued within the fund, for more information on the fees please visit the fund's web page noted above. Investment return and principal value will fluctuate such that shares, when redeemed, may be worth more or less than their original cost. All returns that exceed 12 months are annualized.

Investment Philosophy

The Matrix Trust Company GoalPath Portfolios are designed to manage risks that face retirement plan investors when it comes to replacing their income. The GoalPath Portfolios take into account the transfer of human capital (current and future earnings power) to financial capital (retirement savings) over time. As retirement approaches, the GoalPath Portfolios recognizes this shifting risk and gradually change their asset allocation, holding more growth-focused assets (stocks and bonds) when an investor is many years away and more inflation protected hedged income securities (TIPS) as the target retirement date approaches. Conceptually, you can think of this process as systematically investing and accumulating "slices of retirement income" - a stream of inflation-adjusted annual income throughout retirement. By seeking to manage the relevant risks, we aim to increase clarity for investors as they plan for retirement, and to enable the delivery of meaningful information to help participants and plan sponsors better assess retirement readiness.

Investment Strategy

The GoalPath Fi360 2050 Indexed Aggressive Portfolio focuses on growth consistent with its target retirement date and, as it approaches its target date, management of retirement income risk. It seeks to allocate between (index) fixed income and (index) equity growth investments to balance income risk management against the opportunity to grow expected retirement income. The overall effect of interest rate fluctuations and equity market performance may impact the ability to achieve a desired level of retirement income. The portfolio may be appropriate for investors with a higher risk tolerance and a planned retirement date on or about 2050. The portfolio invests in an allocation of global equities, global fixed income, and treasury inflation protected securities by investing in mutual funds, collective investment funds, exchange-traded funds and other pooled investment vehicles. The portfolio is constructed and monitored using various statistics and measures, including, but not limited to, the Fi360 Fiduciary Score and its underlying components. The portfolio will initially allocate approximately 95% of assets in global equities, 5% in global fixed income, and initially 0% in treasury inflation protected securities. As the portfolio's target date approaches the global equities and fixed income allocation will be reduced and allocated to treasury inflation protected securities, reaching its most conservative allocation of approximately 60% global equities on or about its target retirement date.

Performance information reflects past performance and does not guarantee future results. All returns are net of any fees that accrued within the fund, for more information on the fees please visit the fund's web page noted above. Investment return and principal value will fluctuate such that shares, when redeemed, may be worth more or less than their original cost. All returns that exceed 12 months are annualized.

Investment Philosophy

The Matrix Trust Company GoalPath Portfolios are designed to manage risks that face retirement plan investors when it comes to replacing their income. The GoalPath Portfolios take into account the transfer of human capital (current and future earnings power) to financial capital (retirement savings) over time. As retirement approaches, the GoalPath Portfolios recognize this shifting risk and gradually change their asset allocation, holding more growth-focused assets (stocks and bonds) when an investor is many years away and more inflation protected hedged income securities (TIPS) as the target retirement date approaches. Conceptually, you can think of this process as systematically investing and accumulating "slices of retirement income"—a stream of inflation-adjusted annual income throughout retirement. By seeking to manage the relevant risks, we aim to increase clarity for investors as they plan for retirement, and to enable the delivery of meaningful information to help participants and plan sponsors better assess retirement readiness.

Investment Strategy

The GoalPath Fi360 2060 Indexed Moderate Portfolio focuses on growth consistent with its target retirement date and, as it approaches its target date, management of retirement income risk. It seeks to allocate between (index) fixed income and (index) equity growth investments to balance income risk management against the opportunity to grow expected retirement income. The overall effect of interest rate fluctuations and equity market performance may impact the ability to achieve a desired level of retirement income. The portfolio may be appropriate for investors with a moderate risk tolerance and a planned retirement date on or about 2060. The portfolio invests in an allocation of global equities, global fixed income, and treasury inflation protected securities by investing in mutual funds, collective investment funds, exchange-traded funds and other pooled investment vehicles. The portfolio is constructed and monitored using various statistics and measures, including, but not limited to, the Fi360 Fiduciary Score and its underlying components. The portfolio will initially allocate approximately 95% of assets in global equities, 5% in global fixed income, and initially 0% in treasury inflation protected securities. As the portfolio's target date approaches the global equities and fixed income allocation will be reduced and allocated to treasury inflation protected securities, reaching its most conservative allocation of approximately 50% global equities on or about its target retirement date.
