COVER PAGE (CONTINUED)

This report has been created by your financial consultant under a license agreement with Fi360, Inc. Your financial consultant and Fi360 are not affiliated. This report is designed to provide performance data and other information regarding a portfolio of investments. Your financial consultant is solely responsible for any advice or recommendations provided. In some cases, this portfolio may be an investment option that is available (or proposed to be made available) in a defined contribution plan. To the extent that this report is used by the financial consultant with respect to any defined contribution plan, any such use, advice, or recommendation is solely the responsibility of such financial consultant, including advice or recommendations as to the suitability of any investment options for the defined contribution plan.

Please see important disclosures in the Statement of Additional Disclosures. Investors should consider the investment objectives, risks, charges, and expenses of a fund before investing. *Prospectuses containing this and other information about the underlying funds included in a portfolio are available by contacting your financial consultant. Please read the prospectus carefully before investing to make sure that the fund is appropriate for your goals and risk tolerance. Past performance is no guarantee of future results.*

Although Fi360 obtains data from sources it deems to be reliable, it does not independently verify the data, and does not warrant or represent that the data is timely, complete, or accurate.

GoalPath Fi360 Funds

PORTFOLIO CONSTRUCTION AND REBALANCING
THAT LEVERAGES THE *FIDUCIARY SCORE*®

GoalPath
SOLUTIONS

Fi360
A Broadridge® Company

Making fiduciary review and rebalancing scalable for retirement plan advisors

A rigorous, evidence-based selection process with quantitative and qualitative review

New “best-practices” open architecture QDIA solution with multiple glidepaths

Overview of the Fund Series

GoalPath Fi360 Funds are designed to manage risks that face retirement plan investors when it comes to replacing their income. The Funds take into account the transfer of human capital (current and future earnings power) to financial capital (retirement savings) over time. As retirement approaches, the Funds recognize this shifting risk and gradually change their asset allocation, holding more growth-focused assets (stocks and bonds) when an investor is many years away and more inflation protected hedged income securities (TIPS) as the target retirement date approaches.

Investment Selection Process: An Evidence-Based Approach

Our Academic Review Committee’s investment selection process combines robust academic research, Modern Portfolio Theory, rigorous testing and thorough peer review to select the investment lineup.

The Fi360 Fiduciary Score®

The **Fi360 Fiduciary Score** is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Fi360 Fiduciary Score is calculated on a monthly basis for investments with at least a three-year history. The score is calculated for open-end mutual funds, exchange-traded funds, collective investment trust funds, and group retirement plan annuities.

Investment List as of May 1, 2022

Questions. Answers.

What's the advantage of including Fi360's Scores as a fund selection factor within GoalPath's strategies?

Including Fi360 Scores as a criteria within GoalPath's fund selection process 'builds-in' scalable fiduciary reviews and rebalancing for advisors who select these strategies. This is a great example of technology driving efficiencies in fiduciary account management.

What is the relationship between GoalPath and Fi360?

GoalPath licenses Fi360's Fiduciary Score as one of several fund selection criteria for use within the GoalPath Fi360 Funds. Fi360 serves only as a data provider to GoalPath and is not a sub-advisor to the funds.

INVESTMENT COMMENTARY

DFA LTIP INSTITUTIONAL W - DRXIX - INFLATION-PROTECTED BOND - ACTIVE

WATCH

INVESTMENT NOTES AS OF 3/31/2024

Review of 10 Year Data: Returns for the fund rank in the bottom quartile versus peers. Alpha for the fund ranks in the bottom quartile versus peers. Sharpe Ratio for the fund ranks in the bottom quartile versus peers. Info Ratio for the fund ranks in the third quartile versus peers. Sortino Ratio for the fund ranks in the bottom quartile versus peers. R2 for the fund ranks in the third quartile versus peers. Tracking Error for the fund ranks in the bottom quartile versus peers.

The Dimensional Long-Term *Inflation Protected U.S. Treasury* Fund (DRXIX) is unique to the GoalPath Conservative Glidepath and prioritizes *Income as the Outcome* in a manner consistent with the DOL's Tips for Fiduciaries guidance and the SECURE Act. When benchmarking this fund, it is important to remember the following:

DRXIX is 100% comprised of **Inflation Protected U.S. Treasuries**, so while the fund is subject to short-term swings in account volatility which will vary inversely with moves in interest rates, principal values are guaranteed making this an ideal solution for modelling future retirement liabilities. Learn more about the underlying Liability-Driven Investment Philosophy that powers the solution here: **FOCUSING ON INCOME AS THE OUTCOME WITH LDI**.

Because Dimensional Funds built DRXIX with a specific purpose in mind (protecting inflation adjusted income streams over the life of the participant/retiree), they have partnered with S&P to track and model its use within an LDI framework. This custom benchmark is unique to the conservative glidepath. Learn more: **S&P STRIDE** (Shift To Retirement Income and Decumulation).

GoalPath partners with Fi360 to scale a process for our clients and advisory community. Morningstar serves as the primary source of data for reporting. Periodically there are irregularities in that data. As it pertains to DRXIX, the Fi360 default quantitative instance has measured the fund against a benchmark that is not the primary reflection of the underlying fund. GoalPath is monitoring closely through supplemental quantitative and qualitative reviews. As the fund is entirely comprised of U.S. Treasury investments we are confident in its continued use.

Fiduciary Plan Review & 3(38) Investment Report

ANNUAL INVESTMENT OPTION COSTS

Each investment option is listed below. In many cases, especially in 401k plans, part of the expense ratio may be directed via 'revenue sharing' to other service providers such the advisor, recordkeeper or custodian. 12B-1 fees are commonly sent to the advisor while Sub-TA and Shareholder Service (SHR SVC) fees are commonly sent to the recordkeeper and/or custodian. Revenue sharing can be offset against other costs charged by a provider or additive to other costs they charge (see the Annual Cost Breakdown section for additional information). Fi360 calculates the MGMT FEE by subtracting any of these revenue sharing elements from the net expense ratio.

ANNUAL INVESTMENT OPTION COSTS

FEE WAIVERS

DFA Short-Term Extended Quality I Dimensional Fund Advisors LP (the "Advisor") has agreed to waive certain fees and in certain instances, assume certain expenses of the Portfolio. The Fee Waiver and/or Expense Assumption Agreement for the Portfolio will remain in effect through February 28, 2025, and may only be terminated by the Fund's Board of Directors prior to that date. Under certain circumstances, the Advisor retains the right to seek reimbursement for any fees previously waived and/or expenses previously assumed up to thirty-six months after such fee waiver and/or expense assumption.

DFA US Large Company I Dimensional Fund Advisors LP (the "Advisor") has agreed to waive certain fees of the Portfolio. The Fee Waiver Agreement for the Portfolio will remain in effect through February 28, 2025, and may only be terminated by the Fund's Board of Directors prior to that date. Under certain circumstances, the Advisor retains the right to seek reimbursement for any fees previously waived up to thirty-six months after such fee waiver.

DFA US Small Cap I Dimensional Fund Advisors LP (the "Advisor") has agreed to waive certain fees and in certain instances, assume certain expenses of the Portfolio. The Fee Waiver and/or Expense Assumption Agreement for the Portfolio will remain in effect through February 28, 2025, and may only be terminated by the Fund's Board of Directors prior to that date. Under certain circumstances, the Advisor retains the right to seek reimbursement for any fees previously waived and/or expenses previously assumed up to thirty-six months after such fee waiver and/or expense assumption.

Federated Hermes Inflation Ptctd Sec IS The Adviser and certain of its affiliates on their own initiative have agreed to waive certain amounts of their respective fees and/or reimburse expenses. Effective December 1, 2023, total annual fund operating expenses paid by the Fund's A, C, IS and R6 classes (after the voluntary waivers and/or reimbursements) will not exceed 0.59%, 1.37%, 0.34% and 0.30% (the "Fee Limit"), respectively, up to but not including the later of (the "Termination Date"): (a) December 1, 2024 ; or (b) the date of the Fund's next effective Prospectus. Prior to December 1, 2023, the Fee Limit for the Class C Shares was 1.34%. While the Adviser and its affiliates currently do not anticipate terminating or increasing these arrangements prior to the Termination Date, these arrangements may only be terminated or the Fee Limit increased prior to the Termination Date with the agreement of the Trustees.

Federated Hermes MDT Large Cap Growth IS The Adviser and certain of its affiliates on their own initiative have agreed to waive certain amounts of their respective fees and/or reimburse expenses. Total annual fund operating expenses (excluding acquired fund fees and expenses, interest expense, extraordinary expenses and proxy-related expenses paid by the Fund, if any) paid by the A, C and IS classes (after the voluntary waivers and/or reimbursements) will not exceed 0.99%, 1.74% and 0.74% (the "Fee Limit"), respectively, up to but not including the later of (the "Termination Date"): (a) October 1, 2024 ; or (b) the date of the Fund's next effective Prospectus. While the Adviser and its affiliates currently do not anticipate terminating or increasing these arrangements prior to the Termination Date, these arrangements may only be terminated or the Fee Limit increased prior to the Termination Date with the agreement of the Trustees.

Federated Hermes Treasury Obl IS The Adviser and certain of its affiliates on their own initiative have agreed to waive certain amounts of their respective fees and/or reimburse expenses. Total annual fund operating expenses (excluding acquired fund fees and expenses, interest expense, extraordinary expenses and proxy-related expenses paid by the Fund, if any) paid by the Fund's IS class (after the voluntary waivers and/or reimbursements) will not exceed 0.20% (the "Fee Limit") up to but not including the later of (the "Termination Date"): (a) October 1, 2024 ; or (b) the date of the Fund's next effective Prospectus. While the Adviser and its affiliates currently do not anticipate terminating or increasing these arrangements prior to the Termination Date, these arrangements may only be terminated, or the Fee Limit increased, prior to the Termination Date with the agreement of the Trustees.

MassMutual Small Cap Opps I The expenses in the above table reflect a written agreement by MML Advisers to cap the fees and expenses of the Fund (other than extraordinary legal and other expenses, Acquired Fund Fees and Expenses, interest expense, expenses related to borrowings, securities lending, leverage, taxes, and brokerage, short sale dividend and loan expense, or other non-recurring or unusual expenses such as organizational expenses and shareholder meeting expenses, as applicable) through January 31, 2025 , to the extent that Total Annual Fund Operating Expenses after Expense Reimbursement would otherwise exceed 0.65%, 0.75%, 0.85%, 0.95%, 1.10%, 1.15%, 1.35%, and 0.75% for Classes I, R5, Service, Administrative, R4, A, R3, and Y, respectively. The Total Annual Fund Operating Expenses after Expense Reimbursement shown in the above table may exceed these amounts, because, as noted in the previous sentence, certain fees and expenses are excluded from the cap.

MassMutual Total Return Bond I The expenses in the above table reflect a written agreement by MML Advisers to cap the fees and expenses of the Fund (other than extraordinary legal and other expenses, Acquired Fund Fees and Expenses, interest expense, expenses related to borrowings, securities lending, leverage, taxes, and brokerage, short sale dividend and loan expense, or other non-recurring or unusual expenses such as

STYLE SUMMARY

This section groups each investment into a style category. The top charts show the number of investments grouped by their current Morningstar Style Box™. The bottom tables include investments within other style categories based on their current peer group. The Morningstar Style Box™ is a nine-square grid that provides a graphical representation of the investment style of mutual funds, exchange traded funds, group retirement plan annuities, variable annuity sub-accounts and separately managed accounts. US and International equities are classified according to market capitalization (the vertical axis) and growth and value factors (the horizontal axis). Fixed income funds are classified according to credit quality of the long bonds owned (the vertical axis) and interest rate sensitivity as measured by a bond's effective duration (the horizontal axis).

SHARE CLASS COMPARISON

This section displays a table for each mutual fund/ETF investment. Your selected share class(es) are colored in a blue background and any other related share classes will be displayed for analysis. Depending on the platform you are using and the amount of money you have to invest, a given share class may not be available. Consult your advisor for additional details.

Mutual funds and Exchange Traded Funds (ETFs) are sold by prospectus. Please consider the investment objectives, risks, charges and expenses carefully before investing. The prospectus, and, if available, the summary prospectus, which contains this and other information, can be obtained by calling your financial advisor. Read the prospectus and, if available, the summary prospectus carefully before you invest. The performance information shown represents past performance and is not a guarantee of future results. Investment returns and principal value of an investment will fluctuate so that when shares are redeemed, they may be worth more or less than their original cost. The performance information shown reflects performance without adjusting for sales charges. If adjusted, the load would reduce the performance quoted. Current performance may be higher or lower than the data shown. For the most recent month-end performance and information on expenses, visit www.fi360.com/directory. Percentile ranks calculated by Fi360, are based on the return shown compared to peer group (1 = top rank), do not account for sales charges, and are not provided for periods under a year.

Best-Fit Index	18.44%	18.31%	-2.54%	-20.09%	9.83%	2.37%

This graph shows a fund's performance based on how \$10,000 invested in the fund would have grown over time with dividends reinvested. The returns used in the graph are not load-adjusted. The growth of \$10,000 begins at the fund's inception, or the first year listed on the graph, whichever is appropriate. Located alongside the fund's graph line are lines that represent the growth of \$10,000 in the fund's Broad Index, Peer Group Index, and Best-fit Index Benchmarks, which are listed in the Benchmarks section. All lines are plotted on a logarithmic scale, so that identical percentage changes in the value of an investment have the same vertical distance on the graph. This provides a more accurate representation of performance than would a simple arithmetic graph.

INVESTMENT STRATEGY

The investment seeks long-term capital appreciation. The Portfolio purchases a broad and diverse group of securities associated with emerging markets, which may include frontier markets (emerging market countries in an earlier stage of development), authorized for investment by the Advisor's Investment Committee ("Approved Markets"). It may gain exposure to companies in Approved Markets by purchasing equity securities in the form of depository receipts, which may be listed or traded outside the issuer's domicile country.

CURRENT MORNINGSTAR STYLE BOX™

INVESTMENT STRATEGY

The investment seeks long-term capital appreciation. The Portfolio will invest at least 80% of its net assets in securities of large cap companies in the particular markets in which the Portfolio invests. The Advisor determines the minimum market capitalization of a large company with respect to each country or region in which the Portfolio invests. It also may purchase or sell futures contracts and options on futures contracts for foreign or U.S. equity securities and indices, to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the Portfolio.

INTEREST-RATE SENSITIVITY

INVESTMENT STRATEGY

The investment seeks to provide total return consistent with inflation protected long-term instruments. The fund seeks its investment objective by generally investing in a universe of long-term fixed income securities structured to provide protection against inflation. It may invest in inflation-protected securities issued by the U.S. government and its agencies and instrumentalities. The fund also may invest in inflation-protected securities of other investment grade issuers including foreign governments and U.S. and non-U.S. corporations.

This graph shows a fund's performance based on how \$10,000 invested in the fund would have grown over time with dividends reinvested. The returns used in the graph are not load-adjusted. The growth of \$10,000 begins at the fund's inception, or the first year listed on the graph, whichever is appropriate. Located alongside the fund's graph line are lines that represent the growth of \$10,000 in the fund's Broad Index, Peer Group Index, and Best-fit Index Benchmarks, which are listed in the Benchmarks section. All lines are plotted on a logarithmic scale, so that identical percentage changes in the value of an investment have the same vertical distance on the graph. This provides a more accurate representation of performance than would a simple arithmetic graph.

INVESTMENT STRATEGY

The investment seeks to maximize total returns from the universe of debt securities in which the Portfolio invests. As a non-fundamental policy, under normal circumstances, the Portfolio will invest at least 80% of its net assets in fixed income securities considered to be investment grade quality. In addition, the Portfolio is authorized to invest more than 25% of its total assets in U.S. Treasury bonds, bills and notes, and obligations of federal agencies and instrumentalities.

CURRENT MORNINGSTAR STYLE BOX™

INVESTMENT STRATEGY

The investment seeks to achieve long-term capital appreciation. The fund purchases a broad and diverse group of securities of U.S. companies. It invests in companies of all sizes, with increased exposure to smaller capitalization, lower relative price, and higher profitability companies as compared to their representation in the U.S. Universe. The Advisor generally defines the U.S. Universe as a market capitalization weighted set of U.S. operating companies listed on a securities exchange in the United States that is deemed appropriate by the Advisor.

CURRENT MORNINGSTAR STYLE BOX™

INVESTMENT STRATEGY

The investment seeks to approximate the total investment return of the S&P 500® Index. The fund generally invests in the stocks that comprise the S&P 500® Index in approximately the proportions they are represented in the S&P 500® Index. Under normal market conditions, at least 95% of the fund's net assets will be invested in the stocks that comprise the S&P 500® Index. The fund may purchase or sell futures contracts and options on futures contracts for U.S. equity securities and indices, to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the Portfolio.

CURRENT MORNINGSTAR STYLE BOX™

INVESTMENT STRATEGY

The investment seeks long-term capital appreciation. The fund, using a market capitalization weighted approach, purchases a broad and diverse group of readily marketable securities of U.S. small cap companies. A company's market capitalization is the number of its shares outstanding times its price per share. Under a market capitalization weighted approach, companies with higher market capitalizations generally represent a larger proportion of the fund than companies with relatively lower market capitalizations.

CURRENT MORNINGSTAR STYLE BOX™

INVESTMENT STRATEGY

The investment seeks long-term capital appreciation. The fund invests primarily in the common stock of large-sized U.S. companies. The investment adviser's investment strategy utilizes a large-cap growth approach by selecting most of its investments from companies listed in the Russell 1000® Growth Index. The fund will invest its assets so that at least 80% of its net assets (plus any borrowings for investment purposes) are invested in large-cap investments.

Best-Fit Index	-	-	-	-	-	-

This graph shows a fund's performance based on how \$10,000 invested in the fund would have grown over time with dividends reinvested. The returns used in the graph are not load-adjusted. The growth of \$10,000 begins at the fund's inception, or the first year listed on the graph, whichever is appropriate. Located alongside the fund's graph line are lines that represent the growth of \$10,000 in the fund's Broad Index, Peer Group Index, and Best-fit Index Benchmarks, which are listed in the Benchmarks section. All lines are plotted on a logarithmic scale, so that identical percentage changes in the value of an investment have the same vertical distance on the graph. This provides a more accurate representation of performance than would a simple arithmetic graph.

INTEREST-RATE SENSITIVITY

INVESTMENT STRATEGY

The investment seeks to provide current income consistent with stability of principal. The fund invests in a portfolio of U.S. Treasury securities maturing in 397 days or less and repurchase agreements collateralized fully by U.S. Treasury securities. It will invest its assets so that at least 80% of its net assets (plus any borrowings for investment purposes) are invested in Treasury investments. The fund may also hold cash.

Large Growth

INVESTMENT STRATEGY

The investment seeks growth of capital. Under normal circumstances, the fund invests at least 80% of its assets in common stocks. Its portfolio seeks to be broadly diversified by industry and company. The fund may invest in a broad range of market capitalizations, but the advisor tends to focus on large capitalization companies with market capitalizations similar to those of companies in the S&P 500 Index.

CURRENT MORNINGSTAR STYLE BOX™

INVESTMENT STRATEGY

The investment seeks long-term capital appreciation. The fund normally invests at least 80% of its total assets in a diversified portfolio of equity securities, or derivative investments that provide exposure to equity securities, of companies located outside of the United States that the fund's sub-advisers consider to offer attractive valuations. It invests in a variety of countries throughout the world including emerging market countries and may, from time to time, invest more than 25% of its assets in any one country or group of countries. The fund may invest in companies of any market capitalization.

INTEREST-RATE SENSITIVITY

INVESTMENT STRATEGY

The investment seeks to achieve as high a total rate of real return on an annual basis as is considered consistent with prudent investment risk and the preservation of capital. The fund invests at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in inflation-indexed bonds and other income-producing securities. It may also invest in other income-producing securities of any kind. The advisor generally intends to maintain a dollar-weighted average credit quality of A or better. The fund may invest up to 15% of its total assets in securities that are not denominated in U.S. dollars.

CURRENT MORNINGSTAR STYLE BOX™

Small Blend

INVESTMENT STRATEGY

The investment seeks capital appreciation. The fund invests primarily in common stocks of small-capitalization U.S. companies that the fund's subadviser believes have favorable business trends or prospects based on fundamental analysis. Under normal circumstances, the fund invests at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in securities of small-cap companies. The subadviser currently considers "small-cap" companies to be those whose market capitalizations at the time of purchase are within the market capitalization range of companies included in the Russell 2000® Index.

FI360 FIDUCIARY SCORE OVERVIEW

Fi360 Fiduciary Score®

Fiduciary Due Diligence Process

The Fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. It helps quickly identify a short list of investments during the selection process. It also facilitates the ongoing monitoring process by highlighting investments that exhibit potential deficiencies.

FI360 FIDUCIARY SCORE® CRITERIA

Regulatory Oversight The investment should be managed by a bank, trust company, or an insurance company, a registered investment company (mutual fund), or a registered investment advisor.

Minimum Track Record The investment should have at least three years of history.

Stability of the Organization The longest reported manager's tenure should be at least two years.

Assets in the Investment The investment should have at least \$75 million AUM (across all share classes).

Composition Consistent with Asset Class At least 80 percent of the investment's underlying securities should be consistent with the broad asset class.

Style Consistency The investment should be highly correlated to the asset class of the investment option, e.g., the Morningstar Style Box™ must match the peer group of the investment.

Expense Ratios/Fees Relative to Peers The investment's fees should not be in the bottom quartile (most expensive) of their peer group.

Risk-Adjusted Performance Relative to Peers The investment's risk-adjusted performance should be above the peer group median manager's risk-adjusted performance.

Performance Relative to Peers The investment's performance should be above the peer group's median manager return for 1-, 3- and 5-year cumulative periods.

CALCULATING THE FI360 FIDUCIARY SCORE®:

The Fi360 Fiduciary Score® is calculated on a monthly basis for investments with at least a three-year history. Each investment is evaluated against a set of factors and thresholds, then allotted penalty points. The penalty points are totaled and compared to all other investments within the peer group. Investments with 0 penalty points are automatically given a Fi360 Fiduciary Score of 0. Every other investment is then given a score of 1-100, representing their percent ranking based on its placement in the distribution of their peer group.

Fiduciary Plan Review & 3(38) Investment Report

Fi360 FIDUCIARY SCORE® SUMMARY

The Fi360 Fiduciary Score® is a peer percentile ranking of an investment against a set of quantitative due diligence criteria selected to reflect prudent fiduciary management. The Fi360 Fiduciary Score® Average is a one-, three-, five-, or ten-year rolling average of an investment's Fi360 Fiduciary Score®. All Scores are color coded based on the quartile they fall in (1st - Green; 2nd - Light Green; 3rd - Yellow; 4th - Red).

The ID column can be used to reference the investment on the following Scatterplot chart. Investments which do not have both Scores will not have an ID as they cannot be plotted on the chart. If multiple investments have the same Scores, they will be plotted together under 1 ID.

Fi360 FIDUCIARY SCORE® SUMMARY

The chart plots each investment using the selected Fi360 Fiduciary Scores. Investments without both Scores will be excluded from the chart. Green, yellow and red lines are drawn to highlight the different Fi360 Fiduciary Score quartiles. Investments in the bottom left corner of the chart are most preferred.

If \$ asset amounts are included, bubble sizes are based on the relative percentage invested in that investment. Bubble numbers refer to the ID's on the previous page(s). If multiple investments have the same Scores, they will be plotted together under 1 ID.

Net Expense Ratio 0.43
Fee per \$1,000 \$4.30

*Fee per \$1000 is assuming no return and based on total net expense for one year

Operations Information

Net Assets - Share Class 880,000
Inception Date 6/30/2020
Turnover Ratio % 7.36

*No commissions or redemption fees charged for purchases and sales of interests in the fund

Investment Philosophy

The Matrix Trust Company GoalPath Portfolios are designed to manage risks that face retirement plan investors when it comes to replacing their income. The GoalPath Portfolios take into account the transfer of human capital (current and future earnings power) to financial capital (retirement savings) over time. As retirement approaches, the GoalPath Portfolios recognizes this shifting risk and gradually change their asset allocation, holding more growth-focused assets (stocks and bonds) when an investor is many years away and more inflation protected hedged income securities (TIPS) as the target retirement date approaches. Conceptually, you can think of this process as systematically investing and accumulating "slices of retirement income" – a stream of inflation-adjusted annual income throughout retirement. By seeking to manage the relevant risks, we aim to increase clarity for investors as they plan for retirement, and to enable the delivery of meaningful information to help participants and plan sponsors better assess retirement readiness.

Investment Strategy

The GoalPath Fi360 2020 Aggressive Portfolio focuses on growth consistent with its target retirement date and, as it approaches its target date, management of retirement income risk. It seeks to allocate between enhanced index fixed income and enhanced index equity growth investments to balance income risk management against the opportunity to grow expected retirement income. An "enhanced index" fund is a fund that seeks to enhance the returns of an index by using active management to modify the weights of holdings for additional return. The overall effect of interest rate fluctuations and equity market performance may impact the ability to achieve a desired level of retirement income. The portfolio may be appropriate for investors with a higher risk tolerance and a planned retirement date on or about 2020. The portfolio invests in an allocation of global equities, global fixed income, and treasury inflation protected securities by investing in mutual funds, collective investment funds, exchange-traded funds and other pooled investment vehicles. The portfolio is constructed and monitored using various statistics and measures, including, but not limited to, the Fi360 Fiduciary Score and its underlying components. The portfolio will initially allocate approximately 67% of assets in global equities, 2% in global fixed income, and 31% in treasury inflation protected securities. As the portfolio's target date approaches the global equities and fixed income allocation will be reduced and allocated to treasury inflation protected securities, reaching its most conservative allocation of approximately 60% global equities on or about its target retirement date.

GoalPath Fi360 2030 Conv Portfolio I

Portfolio Date: 3/31/2024

Maintained by:
Matrix Trust Company

Fund Profile

CUSIP 57686N605
Morningstar Category US SA Target-Date 2030
Base Currency US Dollar

Fee/ Expense

Net Expense Ratio 0.37
Fee per \$1,000 \$3.70

*Fee per \$1000 is assuming no return and based on total net expense for one year

Operations Information

Net Assets - Share Class 47,760,000
Inception Date 6/30/2020
Turnover Ratio % 17.87

*No commissions or redemption fees charged for purchases and sales of interests in the fund

Investment Philosophy

The Matrix Trust Company GoalPath Portfolios are designed to manage risks that face retirement plan investors when it comes to replacing their income. The GoalPath Portfolios take into account the transfer of human capital (current and future earnings power) to financial capital (retirement savings) over time. As retirement approaches, the GoalPath Portfolios recognizes this shifting risk and gradually change their asset allocation, holding more growth-focused assets (stocks and bonds) when an investor is many years away and more inflation protected hedged income securities (TIPS) as the target retirement date approaches. Conceptually, you can think of this process as systematically investing and accumulating "slices of retirement income" – a stream of inflation-adjusted annual income throughout retirement. By seeking to manage the relevant risks, we aim to increase clarity for investors as they plan for retirement, and to enable the delivery of meaningful information to help participants and plan sponsors better assess retirement readiness.

Investment Strategy

The GoalPath Fi360 2030 Conservative Portfolio focuses on growth consistent with its target retirement date and, as it approaches its target date, management of retirement income risk. It seeks to allocate between enhanced index fixed income and enhanced index equity growth investments to balance income risk management against the opportunity to grow expected retirement income. An "enhanced index" fund is a fund that seeks to enhance the returns of an index by using active management to modify the weights of holdings for additional return. The overall effect of interest rate fluctuations and equity market performance may impact the ability to achieve a desired level of retirement income. The portfolio may be appropriate for investors with a lower risk tolerance and a planned retirement date on or about 2030. The portfolio invests in an allocation of global equities, global fixed income, and treasury inflation protected securities by investing in mutual funds, collective investment funds, exchange-traded funds and other pooled investment vehicles. The portfolio is constructed and monitored using various statistics and measures, including, but not limited to, the Fi360 Fiduciary Score and its underlying components. The portfolio will initially allocate approximately 59% of assets in global equities, 13% in global fixed income, and 28% in treasury inflation protected securities. As the portfolio's target date approaches the global equities and fixed income allocation will be reduced and allocated to treasury inflation protected securities, reaching its most conservative allocation of approximately 25% global equities on or about its target retirement date.

Investment Philosophy

The Matrix Trust Company GoalPath Portfolios are designed to manage risks that face retirement plan investors when it comes to replacing their income. The GoalPath Portfolios take into account the transfer of human capital (current and future earnings power) to financial capital (retirement savings) over time. As retirement approaches, the GoalPath Portfolios recognizes this shifting risk and gradually change their asset allocation, holding more growth-focused assets (stocks and bonds) when an investor is many years away and more inflation protected hedged income securities (TIPS) as the target retirement date approaches. Conceptually, you can think of this process as systematically investing and accumulating "slices of retirement income" — a stream of inflation-adjusted annual income throughout retirement. By seeking to manage the relevant risks, we aim to increase clarity for investors as they plan for retirement, and to enable the delivery of meaningful information to help participants and plan sponsors better assess retirement readiness.

Investment Strategy

The GoalPath Fi360 2040 Moderate Portfolio focuses on growth consistent with its target retirement date and, as it approaches its target date, management of retirement income risk. It seeks to allocate between enhanced index fixed income and enhanced index equity growth investments to balance income risk management against the opportunity to grow expected retirement income. An "enhanced index" fund is a fund that seeks to enhance the returns of an index by using active management to modify the weights of holdings for additional return. The overall effect of interest rate fluctuations and equity market performance may impact the ability to achieve a desired level of retirement income. The portfolio may be appropriate for investors with a moderate risk tolerance and a planned retirement date on or about 2040. The portfolio invests in an allocation of global equities, global fixed income, and treasury inflation protected securities by investing in mutual funds, collective investment funds, exchange-traded funds and other pooled investment vehicles. The portfolio is constructed and monitored using various statistics and measures, including, but not limited to, the Fi360 Fiduciary Score and its underlying components. The portfolio will initially allocate approximately 93% of assets in global equities, 7% in global fixed income, and initially 0% in treasury inflation protected securities. As the portfolio's target date approaches the global equities and fixed income allocation will be reduced and allocated to treasury inflation protected securities, reaching its most conservative allocation of approximately 50% global equities on or about its target retirement date.

*No commissions or redemption fees charged for purchases and sales of interests in the fund

Investment Philosophy

The Matrix Trust Company GoalPath Portfolios are designed to manage risks that face retirement plan investors when it comes to replacing their income. The GoalPath Portfolios take into account the transfer of human capital (current and future earnings power) to financial capital (retirement savings) over time. As retirement approaches, the GoalPath Portfolios recognizes this shifting risk and gradually change their asset allocation, holding more growth-focused assets (stocks and bonds) when an investor is many years away and more inflation protected hedged income securities (TIPS) as the target retirement date approaches. Conceptually, you can think of this process as systematically investing and accumulating "slices of retirement income" – a stream of inflation-adjusted annual income throughout retirement. By seeking to manage the relevant risks, we aim to increase clarity for investors as they plan for retirement, and to enable the delivery of meaningful information to help participants and plan sponsors better assess retirement readiness.

Investment Strategy

The GoalPath Fi360 2050 Aggressive Portfolio focuses on growth consistent with its target retirement date and, as it approaches its target date, management of retirement income risk. It seeks to allocate between enhanced index fixed income and enhanced index equity growth investments to balance income risk management against the opportunity to grow expected retirement income. An "enhanced index" fund is a fund that seeks to enhance the returns of an index by using active management to modify the weights of holdings for additional return. The overall effect of interest rate fluctuations and equity market performance may impact the ability to achieve a desired level of retirement income. The portfolio may be appropriate for investors with a higher risk tolerance and a planned retirement date on or about 2050. The portfolio invests in an allocation of global equities, global fixed income, and treasury inflation protected securities by investing in mutual funds, collective investment funds, exchange-traded funds and other pooled investment vehicles. The portfolio is constructed and monitored using various statistics and measures, including, but not limited to, the Fi360 Fiduciary Score and its underlying components. The portfolio will initially allocate approximately 95% of assets in global equities, 5% in global fixed income, and initially 0% in treasury inflation protected securities. As the portfolio's target date approaches the global equities and fixed income allocation will be reduced and allocated to treasury inflation protected securities, reaching its most conservative allocation of approximately 60% global equities on or about its target retirement date.

Investment Philosophy

The Matrix Trust Company GoalPath Portfolios are designed to manage risks that face retirement plan investors when it comes to replacing their income. The GoalPath Portfolios take into account the transfer of human capital (current and future earnings power) to financial capital (retirement savings) over time. As retirement approaches, the GoalPath Portfolios recognizes this shifting risk and gradually change their asset allocation, holding more growth-focused assets (stocks and bonds) when an investor is many years away and more inflation protected hedged income securities (TIPS) as the target retirement date approaches. Conceptually, you can think of this process as systematically investing and accumulating "slices of retirement income" – a stream of inflation-adjusted annual income throughout retirement. By seeking to manage the relevant risks, we aim to increase clarity for investors as they plan for retirement, and to enable the delivery of meaningful information to help participants and plan sponsors better assess retirement readiness.

Investment Strategy

The GoalPath Fi360 2060 Conservative Portfolio focuses on growth consistent with its target retirement date and, as it approaches its target date, management of retirement income risk. It seeks to allocate between enhanced index fixed income and enhanced index equity growth investments to balance income risk management against the opportunity to grow expected retirement income. An "enhanced index" fund is a fund that seeks to enhance the returns of an index by using active management to modify the weights of holdings for additional return. The overall effect of interest rate fluctuations and equity market performance may impact the ability to achieve a desired level of retirement income. The portfolio may be appropriate for investors with a lower risk tolerance and a planned retirement date on or about 2060. The portfolio invests in an allocation of global equities, global fixed income, and treasury inflation protected securities by investing in mutual funds, collective investment funds, exchange-traded funds and other pooled investment vehicles. The portfolio is constructed and monitored using various statistics and measures, including, but not limited to, the Fi360 Fiduciary Score and its underlying components. The portfolio will initially allocate approximately 95% of assets in global equities, 5% in global fixed income, and initially 0% in treasury inflation protected securities. As the portfolio's target date approaches the global equities and fixed income allocation will be reduced and allocated to treasury inflation protected securities, reaching its most conservative allocation of approximately 25% global equities on or about its target retirement date.

*No commissions or redemption fees charged for purchases and sales of interests in the fund

Investment Philosophy

The Matrix Trust Company GoalPath Portfolios are designed to manage risks that face retirement plan investors when it comes to replacing their income. The GoalPath Portfolios take into account the transfer of human capital (current and future earnings power) to financial capital (retirement savings) over time. As retirement approaches, the GoalPath Portfolios recognizes this shifting risk and gradually change their asset allocation, holding more growth-focused assets (stocks and bonds) when an investor is many years away and more inflation protected hedged income securities (TIPS) as the target retirement date approaches. Conceptually, you can think of this process as systematically investing and accumulating "slices of retirement income" — a stream of inflation-adjusted annual income throughout retirement. By seeking to manage the relevant risks, we aim to increase clarity for investors as they plan for retirement, and to enable the delivery of meaningful information to help participants and plan sponsors better assess retirement readiness.

Investment Strategy

The GoalPath Fi360 2060 Moderate Portfolio focuses on growth consistent with its target retirement date and, as it approaches its target date, management of retirement income risk. It seeks to allocate between enhanced index fixed income and enhanced index equity growth investments to balance income risk management against the opportunity to grow expected retirement income. An "enhanced index" fund is a fund that seeks to enhance the returns of an index by using active management to modify the weights of holdings for additional return. The overall effect of interest rate fluctuations and equity market performance may impact the ability to achieve a desired level of retirement income. The portfolio may be appropriate for investors with a moderate risk tolerance and a planned retirement date on or about 2060. The portfolio invests in an allocation of global equities, global fixed income, and treasury inflation protected securities by investing in mutual funds, collective investment funds, exchange-traded funds and other pooled investment vehicles. The portfolio is constructed and monitored using various statistics and measures, including, but not limited to, the Fi360 Fiduciary Score and its underlying components. The portfolio will initially allocate approximately 95% of assets in global equities, 5% in global fixed income, and initially 0% in treasury inflation protected securities. As the portfolio's target date approaches the global equities and fixed income allocation will be reduced and allocated to treasury inflation protected securities, reaching its most conservative allocation of approximately 50% global equities on or about its target retirement date.
